

Engineering the Future

CV JOINT & CV AXLE

OE Quality Manufacturer

ABOUT KINGTIME DRIVELINE DIVISION

Reinforced Foundation → Exceptional Engineering

Taizhou Kingtime Precision Forging Co., Ltd. is well recognized as the leading blank forging developer and finished product manufacturer in China. Since 1988, Kingtime has devoted a great effort to researching and developing cutting-edge technologies, dedicated itself to the design, development, and manufacture of metal components, and now specialize in developing innovative designed products to achieve increasingly safer and lighter vehicles. With annual production of over 100 million spare parts for Tier-1 companies and 30 years of mature operation management, Kingtime has gained substantial industrial experience in engineering, raw material sourcing, precision forging, isothermal normalizing heat treatment, advanced machining, and complex assembly.

The operation is divided into three divisions with 51 production lines, including Hot Forging Division, Precision Forging Division, and Machining Division. The Driveline Products include CV Joint & CV Axle are developed into OE market and Aftermarket, under the strictly OE Standard Manufacturing Protocol with IATF 16949. Those CV Joints and Axles are quite popular and more favored by authorized car dealer shops.

Strong R&D

Supreme Quality Offering

Bigger Batch Production

Professional Team Long-term Experience

Professional Manufacturer

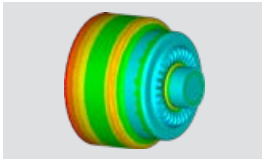

Great Reputation

Social Responsibility

EXCELLENCE & MANUFACTURING

One-stop Services: Simulation • Steel • Forging • Machining

CAE Simulation

Raw Material

Hot Forging

Semi-machined Parts

Fully-machined Parts

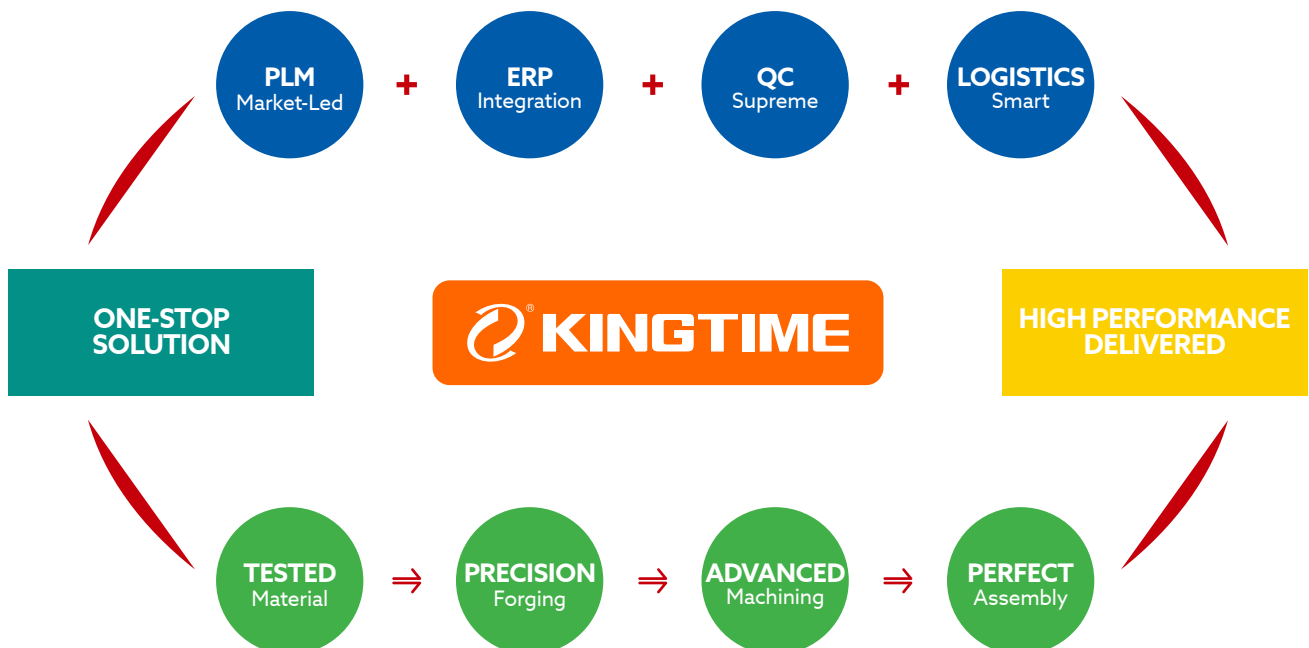

In-house and Complete Manufacturing Advantages

KINGTIME is full of confidence in our capabilities and entire process: from product concept, engineering and design, die-making, forging, processing, heat-treatment, machining and after-sales service. With in-house services, from start to finish, we can meet demanding schedules and oversee all development and production while controlling costs for old or new products.

Operational Excellence

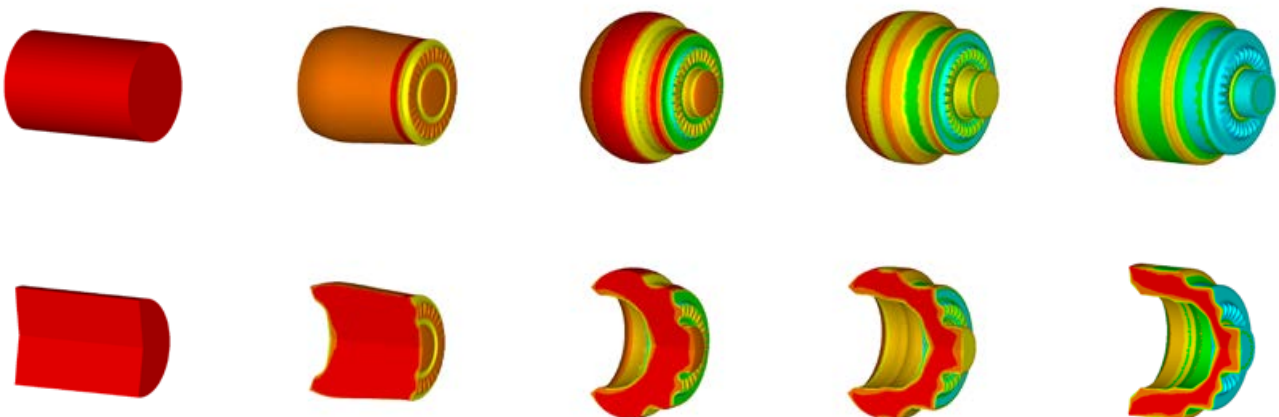

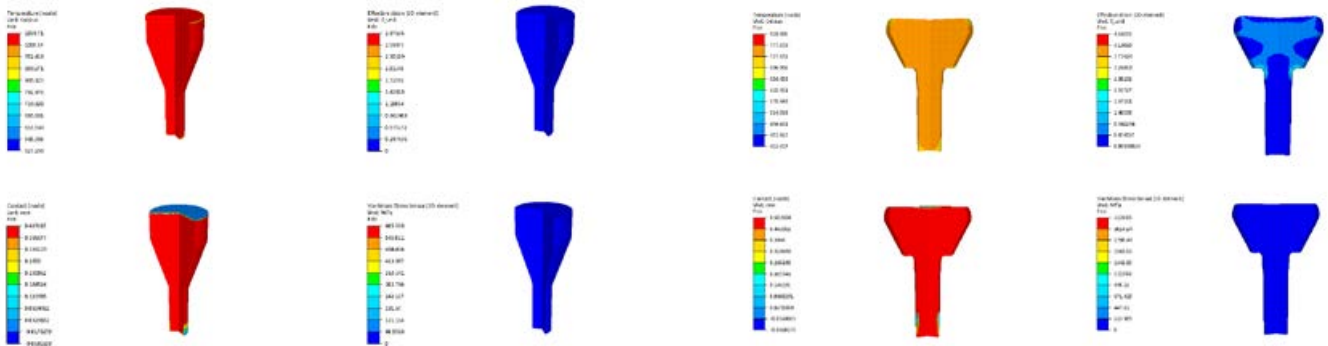

KINGTIME - High Performance Delivered.

KINGTIME has the knowledge, experience, and credentials — qualities that have made us successful in the marketplace — to be there for you. Our global experience and innovative thinking gives us a major advantage when it comes to providing the ultimate driveline system or solution. At the heart of KINGTIME is a strong culture of operational excellence.

STRONGER RESEARCH & DEVELOPMENT

Driving Tomorrow's Technology

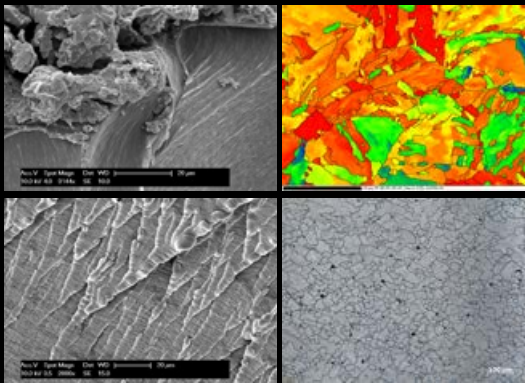

LONGER DURABILITY

The technology leader in CV Joints & all-wheel driveline products

- World-class engineering over 35 years
- Innovative forging & machining technology
- Established and experienced manufacturer in driveline products
- Optimized components through full system understanding
- Improved efficiency, weight, space and fuel savings
- Wider range of CV Joints & CV Axles tested

Materials / Failure Analysis

Solid Support for Longer Durability

HIGHER PERFORMANCE

Performing Your Way

SYSTEMATIC MANUFACTURING

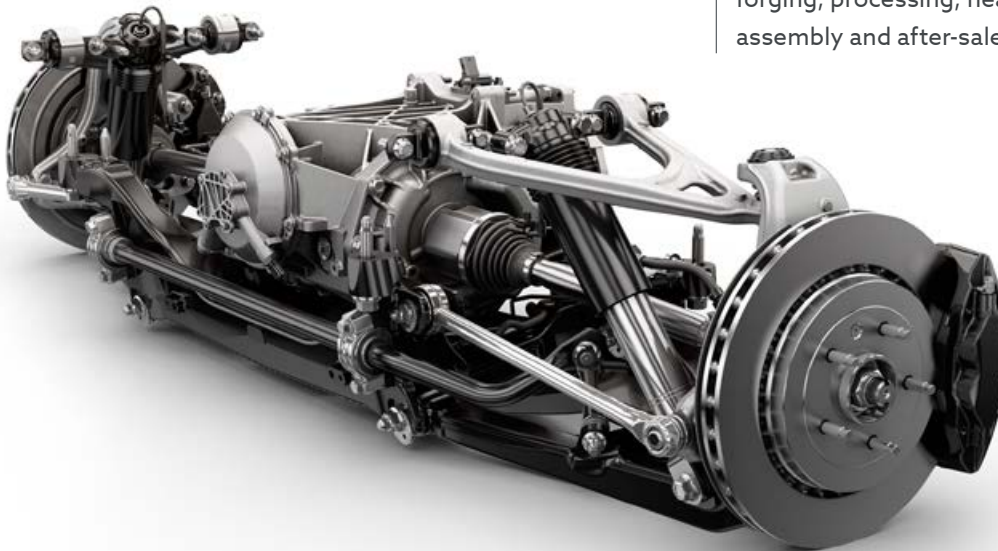

Power & Performance

Reinforced Foundation → Customized Request → 35 Years Industrial Know-how
→ Exceptional Engineering → Ultimate Performance

Moving The World

Exceptional Engineering In Motion & Mobility

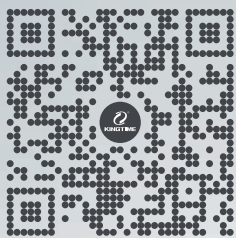

Systematic manufacturing from product concept, engineering, design, die-making, forging, processing, heat-treatment, machining, assembly and after-sales service.

- High Performance & Longer Durability is a Key Focus
- Leading Technology for Getting in the Market Earlier
- All-in-one and In-house Manufacturing and Inspection Operation
- People Excellence & Operational Excellence is a Culture in Kingtime

WIDER RANGE of CAR APPLICATIONS

The Origin and Sourcing Partner of the Best Driveline Solutions
Sourcing for Over 60 Car-Markers
