

Lightweight Forging Solutions

Combined Mature Experience in Practice & Theory

About Us

Taizhou Kingtime Precision Forging Co., Ltd. is well recognized as the leading blank forging developer and finished product manufacturer in China. Since 1988, Kingtime has devoted a great effort to researching and developing cutting-edge technologies, dedicated itself to the design, development, and manufacture of metal components, and now specialize in developing innovative designed products to achieve increasingly safer and lighter vehicles. With annual production of over 100 million spare parts for Tier-1 companies and 30 years of mature operation management, Kingtime has gained substantial industrial experience in engineering, raw material sourcing, precision forging, isothermal normalizing heat treatment, advanced machining, and complex assembly. The operation is divided into three divisions with 50 production lines, including Hot Forging Division, Precision Forging Division, and Machining Division.

Strong R&D

Supreme Quality Offering

Bigger Batch Production

Professional Team Long-term Experience

Professional Manufacturer

Great Reputation

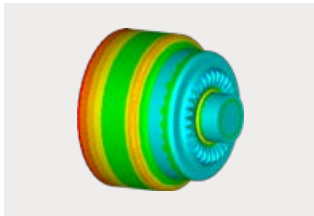

Social Responsibility

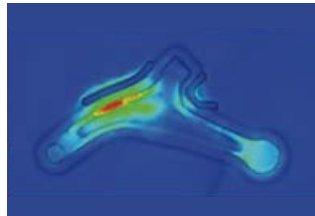

Precision Forging Know-how

We supply the know-how and providing the excellent parts

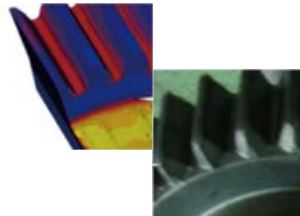

With years of technical experience, our technical team has a solid theoretical basis and advanced experimental method, which can provide you with one-stop technical services such as CAE applications, material failure analysis and additive manufacturing. We can carry out synchronous research & development and provide the best technical support for your product's innovative design.

knowledge & methods

Create Extra Market Value for Customers by Precision Forging and Lightweight Solutions

KINGTIME

- 120,000,000 Units Delivered Annually
- 35 Years of Manufacturing Experience
- 51 Forging Lines
- 6 Heat Treatment Lines
- Over 60,000 different kind of forging parts
- Self-developed Information Operation System
- Familiar with CAE Application
- National High-tech Enterprises
- Award as Specialized Refinement Differential & Innovation Enterprises
- ISO9001 9000 and IATF 16949-2016
